PROFESSIONAL SUMMARY

Business and technology professional with 3+ years of experience supporting and onboarding enterprise SaaS clients, translating business requirements into configured software solutions, and collaborating with clients and technical teams. Hands-on knowledge of SQL, Power BI, Python, and full-stack development, with practical experience in Django, SQL Server, React Native, APIs, and Docker. Strongest professional experience is in onboarding, implementation, requirements gathering, form configuration, workflow/validation setup, UAT, troubleshooting, stakeholder communication, and client training.

CORE SKILLS

Business Analysis & Requirements Gathering • SaaS Onboarding & Implementation • Application/Software Support • SQL & SQL Server • Power BI • Python • Full-Stack Development • Django / REST APIs • React / React Native • Docker • Data Validation • UAT & Testing • Stakeholder Communication

PROFESSIONAL EXPERIENCE

PlanStreet Inc. — Onboarding Specialist | Jan 2023 – Present | Kentucky, United States (Remote)

- Build and configure web-based data collection forms using conditional logic, validation rules, and multi-step workflows.
- Gather and translate client requirements from U.S. state health and social services organizations into configured HMIS, TCOM, and budgeting solutions.
- Lead client onboarding, product training, and recurring support sessions; communicate requirements, issues, and feedback across client, product, and engineering teams.
- Facilitate User Acceptance Testing (UAT), validate functionality against business requirements, and coordinate defect resolution before deployment.
- Troubleshoot application and configuration issues and support enterprise SaaS users through production problems and change requests.
- Perform data validation and quality checks against business rules and assist with SQL-based investigation/reporting when required.
- Use Power BI for dashboard/reporting work when required, alongside primary onboarding and implementation responsibilities.
- Collaborate cross-functionally to deliver enhancements, resolve production issues, and improve client adoption.

MaxRemind Inc. — Full Stack Developer | Sep 2024 – May 2025 | Rawalpindi, Pakistan

- Designed and developed a CRM platform using Django and Microsoft SQL Server.
- Worked on database performance, query optimization, schema design, and backend API development.
- Built React Native mobile applications with Firebase, Redux, and Firebase Cloud Messaging (FCM).
- Containerized application environments using Docker and Docker Compose.
- Worked across frontend, backend, database, API, authentication, and mobile application components.

EDUCATION

Foundation University Islamabad (FUI) — Bachelor's Degree, Information Engineering Technology | 2021 – 2025
